*Abstract:* In 2010, EPA, in concert with its federal partners, began implementation of the Great Lakes Restoration Initiative (GLRI) that was included in the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010 (Public Law 111-88) and subsequent appropriations. The GLRI invests funds in programs and projects strategically chosen to target the most significant environmental problems in the Great Lakes ecosystem. The legislation called for increased accountability for the GLRI and directed EPA to implement a process to track, measure, and report on progress. As part of this process, federal and non-federal entities receiving GLRI funds are required to submit detailed information on GLRI projects into the Great Lakes Accountability System (GLAS). The information is necessary to provide an accurate depiction of activities, progress, and results. Information is updated on a quarterly basis.

*Form Numbers:* None

*Respondents/affected entities:* Great Lakes Restoration Initiative Funding Recipients

*Respondent's obligation to respond:* Required for recipients of GLRI funds

*Estimated number of respondents:* 113

*Frequency of response:* Quarterly

*Total estimated burden:* 2,468 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$140,076.16 (per year), which includes no capital investment or operation & maintenance costs.

*Changes in Estimates:* There is a decrease of 18,195 hours in the total respondent burden compared with the previous ICR. Overall, EPA has a better understanding of how long it takes respondents to complete forms and historical data to project new respondents and active projects over the next three years. Additionally, 1) there is a decrease in the number of respondents due to overestimated figures in the previous information collection; 2) the number of active grants will continue to decrease, as projects are completed and fewer new grants are awarded; and 3) the lower burden hours reflect increased respondent familiarity with the GLAS and the information collection.
